- Optional IFax Upgrade Kit (for fax to e-mail capability) available²
- Separate toner and drum, only replace the part which requires it

KONICA 9665

THE KONICA 9665 DIGITAL LED FACSIMILE: WHEN ALL YOU NEED IS A FAX - AND FOR WHEN YOU NEED MORE - THIS IS THE SOLUTION THAT WILL SAVE YOU TIME, SPACE AND MONEY.

Versatile and flexible

The Konica 9665 is ready to work right out of the box. It lets you transmit and receive documents quickly—at the touch of a button—with a fast 33.6 Kbps G3 modem, transmitting your documents as quickly as 3 seconds per page. This Digital LED facsimile lets you work more efficiently, and increases productivity with such features as broadcasting, group dialing, polling and one-touch speed dialing. Its dual access feature lets you set up an outgoing fax while another is coming in. For a variety of output options, there's the 100-sheet paper tray, 20-sheet automatic document feeder and manual feed for envelopes, labels, overhead transparencies and custom paper sizes. The straight-through paper path of the Konica 9665 ensures consistent, high quality output—no warping and no wrinkling.

Small size, big benefits

When desk space is at a premium, the Konica 9665 can be easily upgraded, eliminating the need for multiple devices and thus maximizing your workspace.

Sharp images, lasting quality

The Konica 9665 features an advanced toner that delivers pin-sharp images and excellent contrast. Furthermore, the ability to transmit and receive at 300 dots per inch dpi, combined with our unique smoothing technology and 64 scales of grey makes sure that incoming faxes always print with clear and sharp business quality.

A complete range of business-class functions—whenever you need them

Looking for an all-in-one, compact solution to replace several space-consuming devices? The built-in Unimessage™ Pro solution for the Konica 9665 combines four critical office functions into one fully integrated, compact and easy-to-use machine. In addition to faxing documents from your PC, the Multi-Functional Product (MFP) kit lets you fax, PC fax, print, copy and scan. These fully integrated desktop messaging applications give you the flexibility to:

- Action your messages and files as they arrive in your PC in-box
- View and edit different types of image files without opening other applications
- Broadcast to multi-recipient distribution lists
- Time-delay transmissions and broadcasts to take advantage of cheaper phone rates
- Scan documents and perform optical character recognition (OCR)

Or select the I-Fax upgrade and send documents as .tif or .pdf files to an e-mail address—or group of addresses—over the internet, quickly and inexpensively.²

SPECIFICATIONS
