

KONICA MINOLTA

Giving Shape to Ideas

# PRINT. PUNCH. WIRE-BIND. IN ONE EASY STEP.

## Professionally printed books. All at the touch of a button.

As document solutions evolve, customers are looking for print products that give their documents a professional finish — sleek, sophisticated and smart. What's more, they're demanding more flexibility and finishing capabilities within their print workflow. Konica Minolta's new GBC eWireBinder in-line twin-loop wire binding technology allows you to create wire bound books instantly at the touch of a button. Combining the GBC G2 Punch and eWire Systems, and the robust range of high-end Konica Minolta production presses, gives print service providers perfectly printed, punched and wire-bound products.

The GBC eWireBinder is the first fully automated twin-loop wire solution worldwide targeting the digital marketplace. It's convenient and efficient, eliminating the need for separate punching, collating and binding. That means drastically reducing manual "touches" on the shop floor — dramatically shortening the production cycle time. You'll be able to create professionally bound documents as quickly and easily as you can print them. Plus, the GBC WireBinder G1 offers different twin-loop wire supplies in a variety of colours and sizes for a wide range of applications.
