¹ BLocal printing requires mobile device and printer to be on the same network (usually Wi-Fi access points bridge wireless to wired connections). Wireless performance is dependent on physical environment and distance from access point. Wireless operations are compatible with 2.4 GHz operations only. Remote printing requires an Internet connection to an HP web-connected printer. Wireless broadband use requires separately purchased service contract for mobile devices. Check with service provider for coverage and availability in your area. See hp.com/go/designjetmobility for more details.

² The HP All-in-One Printer Remote mobile app is available for Apple[®] iPad, iPhone, and iPod Touch running iOS v7.0 or later and for Android[™] mobile devices running Android[™] v4.4 or later. The HP All-in-One Printer Remote mobile app is available for free from the Apple[®] App Store for Apple[®] mobile devices.

³ One integrated print/scan/copy multifunction device compared to separate print, scan, copy devices.
