MB-2000 Punch Bind Solution

AUTOMATE RING BINDING FOR
ATTRACTIVE NEW PRINT PRODUCTS

As a fully automated ring binding solution, the Max Binder MB-2000 targets the global digital marketplace. Convenient and highly efficient, with the MB-2000 separate punching, collating and binding becomes a thing of the past. Manual operation steps on the shop floor are drastically reduced and production times dramatically shortened. Operators can create professional, ring-bound documents quickly and easily, simply as part of the printing process. As an added benefi t, the Max Binder MB-2000 offers two different ring sizes and two colours for a wide range of applications.

Produce high quality documents bound with plastic rings fully automatically with the Max Binder MB-2000, meeting varied customer demand in next to no time! The MB-2000 innovative online ring binding technology increases productivity and reduces production costs by streamlining the binding process and minimising the need for manual intervention. Features such as 360 degree Lay-Flat ring booklets mean enhanced flexibility and convenience to end users, for instance allowing for easy note-taking in class and the quick flipping of pages in meetings. Operators benefi t from non-stop productivity as the open stacker allows removing finished books without stopping the binding unit.

The Max Binder MB-2000 does away with time-consuming manual finishing tasks of the past and achieves a true increase in efficiency. Combining the MB-2000 with one of the high-end production presses in the Konica Minolta range gives print service providers perfectly printed, punched and bound booklets fast and without hassle.

Key features

– Fully automated production.
– Open Stacker allows users to remove bound documents even during system operation.
– Easy refilling is achieved with replaceable cartridges in which ring elements are housed.
– 360 degree Lay-Flat Ring Booklets give users the most flexibility and are convenient for taking notes.
– Ring opening / closing tool is provided to easily replace modified pages.
– Tab stock is also available to make the ring-bound booklets easier to refer to.
