Giving Shape to Ideas

ACCURIOPRO FLUX

THE SIMPLE WAY TO ORGANISE, AUTOMATE
AND OPTIMISE YOUR PRINTER WORKFLOW

AccurioPro Flux

Accurio**Pro** Flux

Workflow Automation Application

Powerful tools to streamline your print room

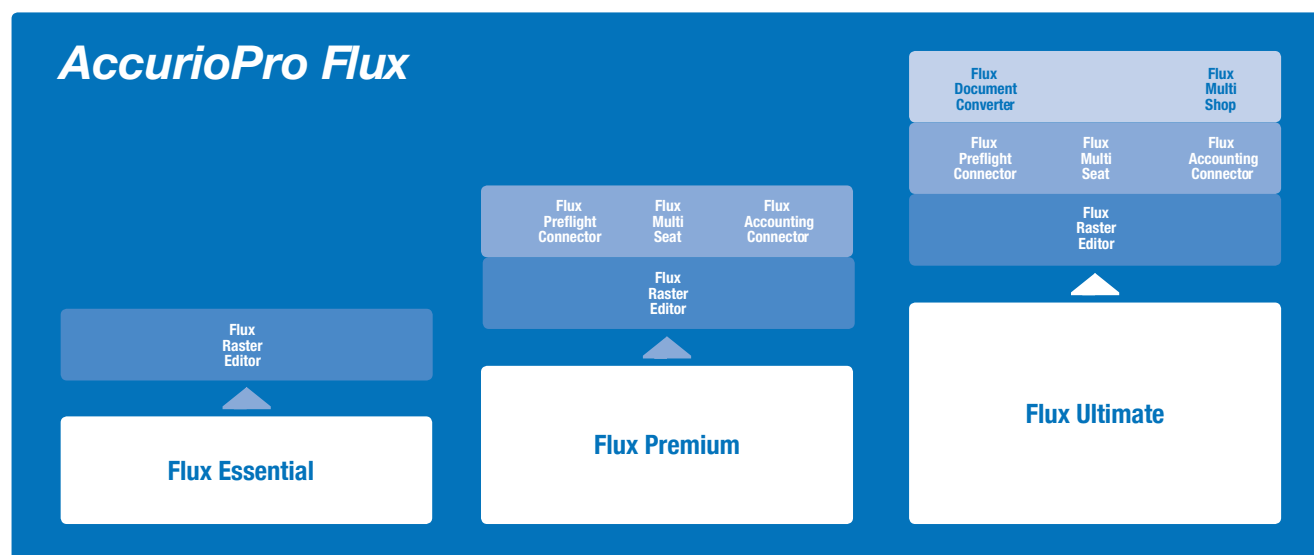

Now you can organise, automate and optimise your entire print workflow. With AccurioPro Flux, you get a suite of powerful tools at your fingertips. Its intuitive central user interface shows you all the main control functions at one glance. You can follow a series of quick and easy steps – whether you want to edit a file, manage print workflow automation or simply print to a specific printer.

This seamless solution enables you to apply a series of standardised settings. Each job will then be printed to the predefined output device – so you can produce complex print jobs in just a few clicks.

AccurioPro Flux gives you centralised control of your complete print room operation.

Highly scalable to suit your needs

Specially developed by Konica Minolta, this advanced software is available in three different modules. So you can choose features to suit your specific requirements:

AccurioPro Flux Essential

Save time and minimise errors

Product-based job processing

This is a great way to get started, and it provides all your key pre-press functions, including tools for make-ready and output management.

Intelligent Job Management

Print job information is able to be changed by the operator, all changes are tracked by the system for future reference.

Flux Raster Editor (Option)

This advanced editor allows editing documents on image/raster basis. It enables typical image editing operations (e.g. despeckle, deskew, brush, erase, line, fill) for single and multiple pages.

Quick File Import

Import print jobs with ease with drag and drop functionality.

Print queue management

Job import – jobs can easily be imported with drag and drop or via scan workflow.

Hot Folders – enables automated import of jobs via hot folders within the company network.

Custom job filters – job lists can be individually filtered by various criteria. This allows you to produce different job lists for comfortable job management.

Cluster printing – output can be produced faster and more economically.

AccurioPro Flux Premium

For print operations

This solution is optimised for use in Centralised Reprographic Departments (CRDs) and in-house print shops of public institutions, universities and corporations.

Flux Premium includes essential tools to minimise your costs and maximise return on investment. Using a job-ticket based print workflow provides you with a tool for easy and convenient ordering of print products.

It enables you to easily route your print jobs via the intranet directly to the print room. Once each job arrives, your print operators can then choose from a wide range of intelligent print functions to administrate all incoming jobs.

With its included range of templates and job tickets, Flux Premium makes it quick and easy for you to set up your print devices and inline finishing.

It means your operators only need to do setups once –so you'll save huge amounts of time on repetitive pre-press work. Flux Premium also enables close collaboration with your print room operators.

You get efficient tools for analysing and streamlining your entire workflow, including:

- **Central job list**
All print jobs are hosted on a central server and can be accessed via multiple operator workstations.
- **Work simultaneously**
Additional Flux Multi Seat licenses can be purchased to allow multiple operators working simultaneously.
- **Report creation**
Print data can be analysed and custom reports created via the included report assistant. A graphic view of the report can be displayed on the dashboard to provide an up-to-date overview for the operator.
- **Job ticket**
Submission of print jobs via clients means users can send print jobs to the print shop via the intranet by using a virtual printer. Jobs can be sent directly from the source application without the need of prior conversion to PDF format.
- **Range of options**
Includes Flux Accounting Connector, Flux Multi Seat and FluxPre-flight Connector.

The screenshot displays the Flux Workstation interface. At the top, there's a menu bar with 'File', 'Job', 'View', 'Configuration', and 'Help'. Below it is a toolbar with icons for 'New print job', 'Scan', 'Jobticket', 'Page preview', 'Sheet preview', 'Edit document', 'Edit images', 'Proof print', and 'Print...'. A sidebar on the left shows a folder tree with 'Incoming (1)', 'Printed', 'Archive', and 'Trash'. The main area features a table of incoming jobs. A callout box points to the 'Incoming (1)' folder, stating 'Check / select the predefined product'. Another callout box points to the job list table, stating 'All incoming jobs are listed up here'. The table has columns for Job no., Title, Sender, Product, Delivery date, Order date, and Printer. Below the table, there are tabs for 'Job information' and 'Production'. The 'Production' tab is active, showing 'Print product' (Booklet A4) and 'Print settings' (Low paper (tray 2), Low paper (LCT)). A callout box points to the 'Print settings' section, stating 'Control the output'. On the right, there's a preview of the print job. A callout box points to the preview, stating 'Switch instantly between three different kinds of previews: - pages - sheets - preflight'.

AccurioPro Flux Ultimate

A highly sophisticated web submission application

Secure, job-ticket based online submission of print jobs is now available for print service providers, in-house print shops, public authorities and the educational sector.

Your end users can take advantage of this convenient service at anytime – while you get the benefit of increasing your print work capacity, by receiving print jobs 24/7.

Flux Ultimate combines online job submission, online payment and online status tracking in one professional web-to-print application. So it now becomes a simple matter to offer your customers job-ticket based online submission of print jobs. Making it the perfect tool if you're using a server environment to provide web printing services.

Flux Ultimate gives you a set of tools to edit and impose your print work to maximise output combined with automated workflow to increase productivity.

Print work can be submitted easily by the print driver installed on your local network – or by directly uploading to the application, then selecting the format you want to print.

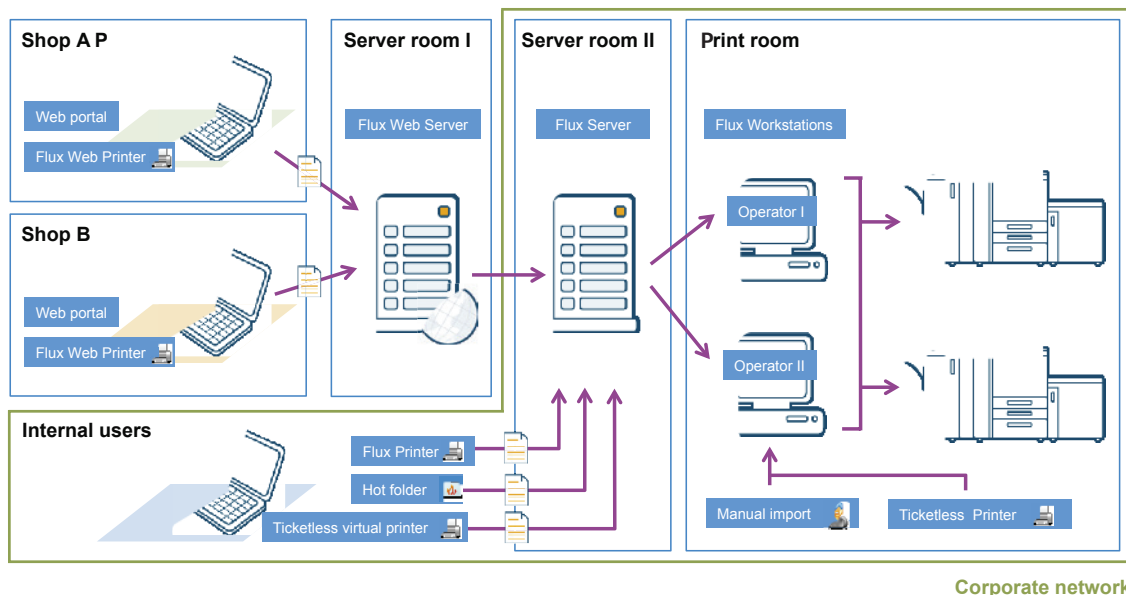

The application will show you a preview of each file's formatting, as well as checking the file for missing fonts, image resolution and transparencies. Approvals can also be set up for costings and job proofing.

With Flux Ultimate, you can offer print-ready documents such as brochures and flyers, along with personalised printed material such as business cards.

You can also offer non-print products, such as promotional products or new starter packs. Features include:

- **Single sign-on**
Users who have already logged in to your company network gain access to the web shop without being prompted to log in again.
- **Convenient online ordering**
Your customers can comfortably upload and preview their jobs before ordering. Non-print articles can also be offered for ordering. You can offer convenient ordering of personalised print products, such as business cards.

- **Pre-flighting**
The application checks if files are printable; images provided by the customer have the proper resolution; fonts are embedded, and transparencies have been included.
- **Different order workflows**
Customers can choose between the quick 2-step order process and a shopping cart (4 steps).
- **Instant online quotation**
The application instantly calculates the price for each print product. Every detail, including monochrome or colour output, paper size and type, is included in the automatic calculation.
- **Online payment**
Secure payment options can be made available to customers to pay online without risk, plus online status tracking.
- **Dashboard and notifications**
The application lets users check their job status at any time online via the software dashboard. Users can also be informed via e-mail about the status of their print jobs.

System Requirements – Flux Workstation

Product Name	AccurioPro Flux
