Giving Shape to Ideas

AQA

Auto Quality Adjustment

How can AQA help?

Boosting Workflow with AQA

 Don't you have a problem like this?

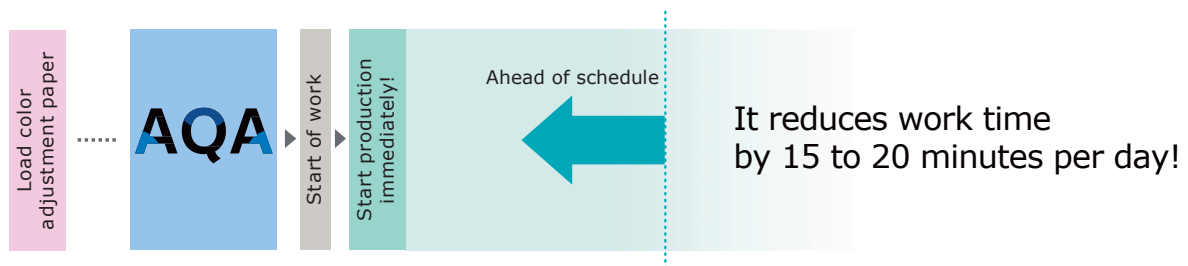

We're spending too much time on Colour Calibration

Colour and image quality is unstable.
It takes a long time to colour match.

Colour adjustment can be completed by "AQA" every morning!

If you set the paper in the tray the day before,
the power will turn on at the timer setting time and adjustment will start automatically.
Production can be started immediately,
image quality is stable, and printing productivity is improved.

 Facing Image problem like this?

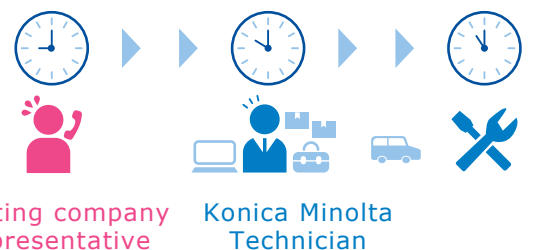

Streaks appeared during the colour adjustment process

An image streak has appeared.
Loss of image down the printed page, we don't know why?

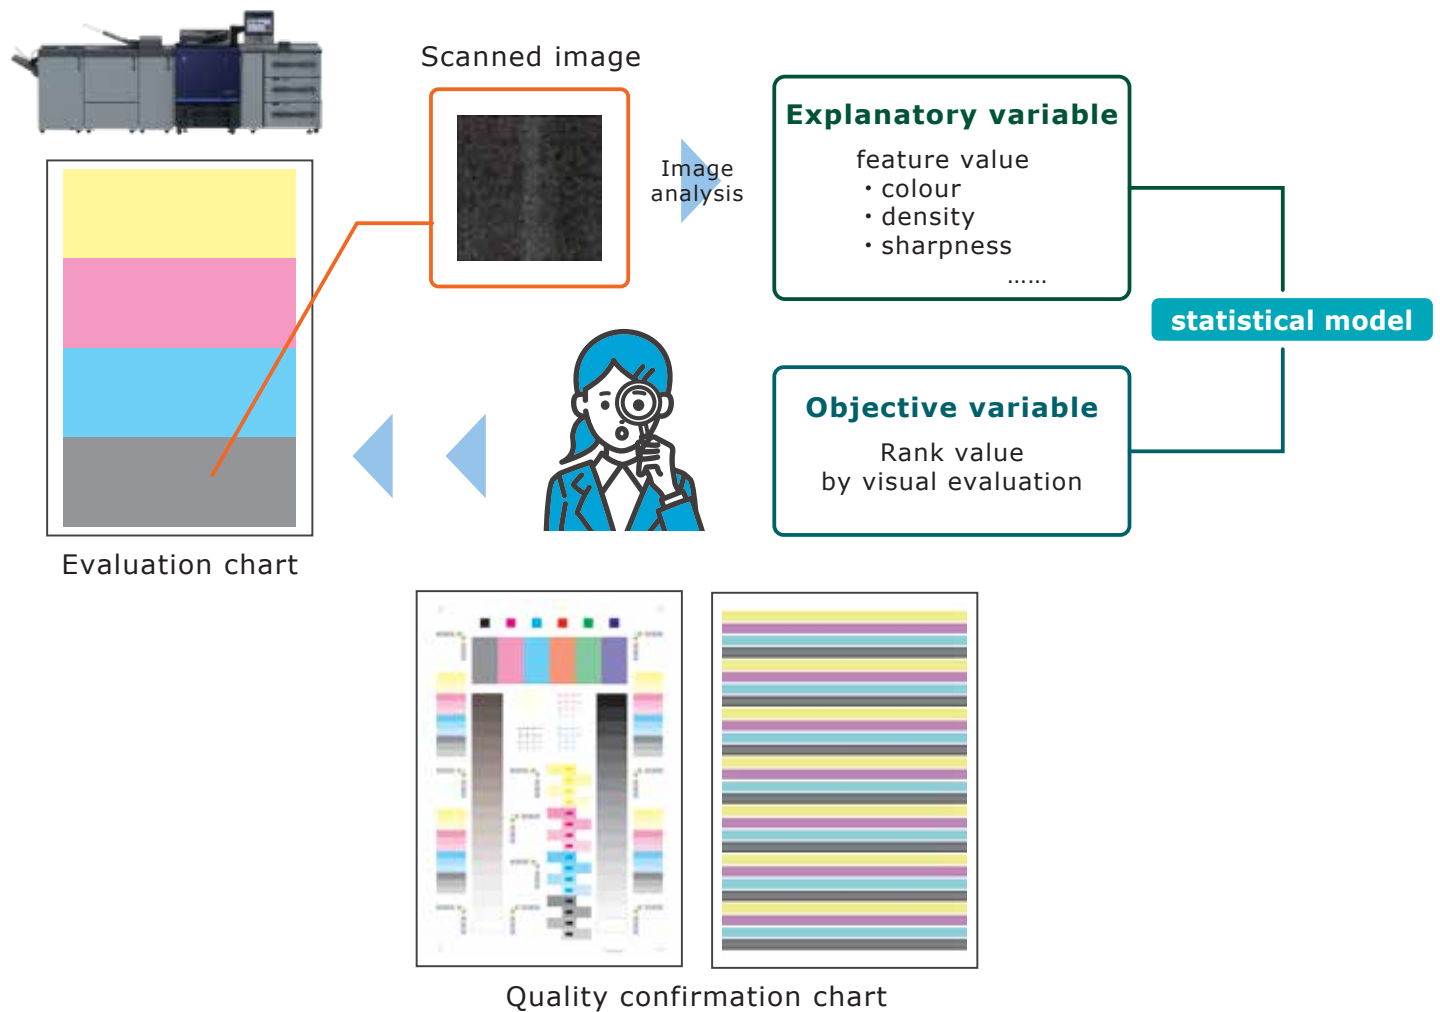

Reduce repair time and minimize machine downtime!

AQA was completed at startup, but streaks remained,
so maintenance was requested.
A technician remotely checked the machine
and visited with necessary repair parts.

What Can AQA Do?

Stable image quality, less downtime!"

**Automation, remote support,
and maintenance improve operating rates.**

POINT
1

Self-Diagnosis Self-Repair

- At power-on or at a specified time, output quality confirmation chart
- Utilising the inline scanner installed in IQ-501 / IQ-601
- Self-diagnosis for image trouble

Depending on the diagnosis result :

- Automatically performs necessary corrections and cleaning
- Performs automatic repair

POINT
2

Enables preventive maintenance

- Diagnostic images are uploaded to server
- Konica Minolta Technician checks the machine condition in advance, providing a detailed understanding of the Image condition.
- Reduce repair work time

Reduce machine downtime!

Join us to explore AQA
Smarter printing, less downtime.

Coming soon!

"The next generation of AQA"

 **Facing These Issues?**

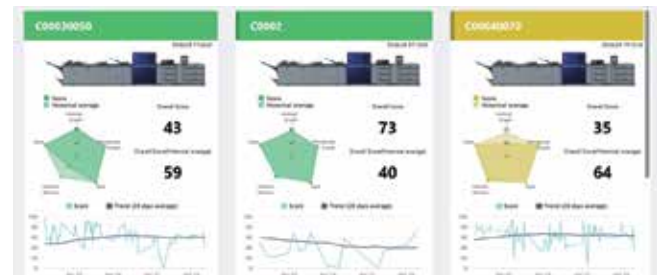

- Unexpected machine downtime delaying deliveries?
- Quality control depends too much on people?

The next generation of AQA Solves It All - Proactively!

Predict Issues Before They Happen

- Detect problems early and act in advance
- Preventive visits and self-maintenance
- Score dashboards show machine status instantly

Reduction in Image quality issues
just reliable performance and peace of mind

Smart Dashboards & Proactive Support!

- Live machine data shared with KM and developers
- Condition scoring brings clarity and confidence
- Part of our premium maintenance service
