

KONICA MINOLTA CLOUD PRINT: THE FUTURE OF PRINT MANAGEMENT

Eliminate Print servers. Simplify IT Management. Enhance Productivity.

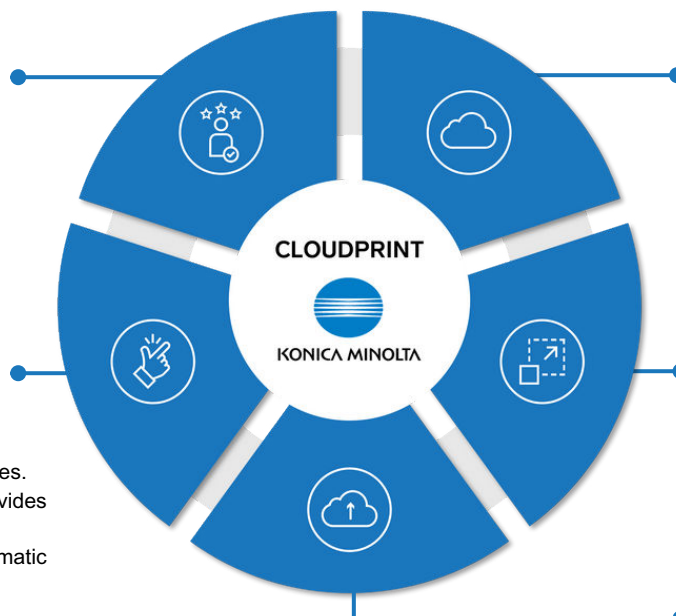

Konica Minolta's CloudPrint Devices revolutionise the way organisations manage print by eliminating the need for traditional print servers, print queues, and driver management. With seamless cloud integration, businesses can experience unparalleled efficiency, cost savings, and security.

Improve user experience

With a simple and intuitive interface, employees can print seamlessly from any connected device, reducing downtime and increasing productivity.

No More Print Queues & Drivers hassles

Say goodbye to the frustration of print driver installations and updates. Konica Minolta's cloud solution provides direct-to-device printing, ensuring a hassle-free experience with automatic compatibility across all user devices.

No Print Servers required

Traditional print environments rely on costly and complex print servers that require ongoing maintenance.

Scalability & Flexibility

Whether you have a small office or a multi-location enterprise, our solution scales effortlessly to meet your needs.

Effortless Cloud migration

The setup process is remarkably simple. With just a few button clicks, it's ready to go. This system removes printing frustrations and allows your IT team to concentrate on what really counts.

Why choose Konica Minolta CloudPrint?

- ✓ Remove costly print server infrastructure
- ✓ Reduce IT burden and operational costs
- ✓ Hassle-free deployment and management
