

# Konica Minolta MFPs with Universal Print help reduce costs and increase productivity

## Offer a simple and secure printing environment for Microsoft 365 users

Konica Minolta bizhub i-Series multi-function printers support Universal Print by Microsoft as Universal Print native printers. By integrating Konica Minolta MFPs with the Microsoft 365 environment, companies can reduce print-related costs and experience an improved printing experience and increased productivity.

With this solution, companies can be free from the management of on-premise assets for printing. IT admins no longer need to manage on-premise print servers. Everyday users who join Microsoft Entra ID no longer need to install printer drivers.

Konica Minolta bizhub i-Series multi-function printers give IT admins more control over the access rights of a printer by connecting to the Microsoft 365 environment. Everyday users who are authenticated and authorised by Microsoft Entra ID can access and execute print jobs without having to install printer drivers.

### How it works

1. Register a printer as a shared printer on the Azure portal  
\* Add our connector into MFP
2. Access and execute the print job (for everyday users who are authenticated and authorised by Microsoft Entra ID)

### Be free from on-premise assets

Be free from the management of on-premise assets for printing by connecting Konica Minolta multi-function printers and the Microsoft 365 environment. IT admins no longer need to manage on-premise print servers.

### Be free from the installation of printer drivers

Everyday users who joined Microsoft Entra ID no longer need to install printer drivers. They can access the printer quickly.

### Secure access

IT admins can control the access rights of a printer while everyday users who are authenticated and authorised by Microsoft Entra ID can only access the printer.

### About Universal Print by Microsoft

Universal Print is a modern print solution that organisations can use to manage their print infrastructure through cloud services from Microsoft. Universal Print runs entirely on Microsoft Azure. When it's deployed with Universal Print-compatible printers, it doesn't require any on-premises infrastructure. Universal Print is a Microsoft 365 subscription-based service that organisations use to centralise print management through the Universal Print portal.

### About Konica Minolta

Konica Minolta is one of the world's leading MFP manufacturers. We provide high-performance, high-quality products to offices around the world to help our clients improve productivity. We're a business-trusted partner that supports customer digital transformation.
