

ENTERPRISE SUITE

A PLATFORM FOR SECURE, FUTURE-READY PRINT AND SCAN WORKFLOWS

YSoft SAFEQ 6 Enterprise Suite offers a centralized, secure, and scalable solution for you to manage your print infrastructure effectively, lower costs, enhance security, and increase productivity—with easy IT management at your fingertips.

Equip your IT team with a centralized tool to oversee print and scan (even fax) for your entire organization. With advanced authentication, automated scan workflows, and powerful cost-control features, the Enterprise Suite delivers

efficiency and flexibility for today's workplaces. Whether deployed on-premises, in a private cloud, or in a hybrid model, you get a future-ready foundation for all your enterprise print and document workflows.

KEY BENEFITS

Improve Security & Data Privacy

Ensure complete print services security with controlled user access, secure document release, and full audit trails.

Empower IT Teams

With centralized management and detailed reporting, IT teams maintain visibility and control to make data-backed optimization decisions with ease.

Support Remote & Hybrid Work

Take advantage of secure, scalable, and anywhere-accessible print and scan workflows.

Eliminate Waste & Cut Costs

Accurately forecast costs and reduce unnecessary printing with quotas, analytics, and rules-based printing.

Streamline Scanning & Digitization

Simplified scan workflows increase productivity and accuracy. With advanced OCR technology powered by ABBYY, you can create searchable, editable documents.

Are You Looking to Simplify IT Management?

Many organizations are now moving to YSoft SAFEQ Cloud, a fully hosted print management solution that eliminates the need for on-premises servers and IT maintenance. With our Cloud Transition License Program, it's easier than ever to migrate—at your pace, your way.

ENTERPRISE SUITE: KEY FEATURES

YSoft SAFEQ 6 is integrated within the user interface of the world's most popular MFDs. These key features deliver on our promise of increasing document security, reducing print service costs, and providing you visibility and control into your organization's print services activity. These features are intuitive and user friendly for end users and print administrators alike.

FEATURE	BENEFITS AT-A-GLANCE
Authentication	<ul style="list-style-type: none">• Protects against unauthorized access to the MFD.• Documents remain secure until the user authenticates via card/mobile reader, PIN, or username/password.• Print jobs no longer needed are never printed.• Easily assign print, copy and scan rights to users or groups of users. Supports guest printing.
Print Roaming™ Client Based Print Roaming (CBPR)	<ul style="list-style-type: none">• Secure printing from any printer in the SAFEQ system without additional print drivers.• Scalable from one office to offices across multiple continents.• Optionally, with CBPR, reduce the number of print servers. required by handling job processing on the user's workstation.
Rules-Based Engine	<ul style="list-style-type: none">• Apply from a library of common cost-reducing rules.• Create your own rules to enforce governance or sustainability by creating triggers.• User notifications sent when print rules have been applied.• Allocate print jobs by billing codes and sub billing codes at the MFD; assign billing codes to certain users.• Apply watermarks for document security upon defined triggers.
Reporting	<ul style="list-style-type: none">• Pre-defined or custom reports provide fact-based data and usage audits. Infinite custom reports can be created.• Dynamic reporting through exports to PowerBI or Tableau.• Generated on demand or scheduled and automatically routed.• Includes pre-defined templates for web reports and sustainability reports.
Mobile Print	<ul style="list-style-type: none">• Native iOS and Android smartphone printing & wireless printing.• Optional printing by file upload to email or web page.• Optional mobile app for authentication.
Credit & Billing	<ul style="list-style-type: none">• Set and manage print quotas.• Create pay-to-print services.• Includes a desktop administration application.
Advanced Scan Workflows powered by ABBYY	<ul style="list-style-type: none">• Automates paper-based tasks with a one-click scan workflow which simplifies scan capture, processing and delivery to pre-defined locations.• Powerful OCR Engine outputs digital documents that are editable and keyword searchable.• Includes connectors to many cloud-based document repositories.
Extension Store	<ul style="list-style-type: none">• Customize your use of SAFEQ and adds support home/remote workers.• Choice of two customizable workflow integrations at no additional charge (for example, Digital Fax, SAP or EPIC)

HOW IT WORKS

1

User submits print job as normal.

2

User authenticates at any printer for access to print/copy/scan; identity is verified against the corporate directory.

3

User chooses desired print job or all print jobs. User can mark a job as a favorite or delete print jobs submitted but no longer needed.¹

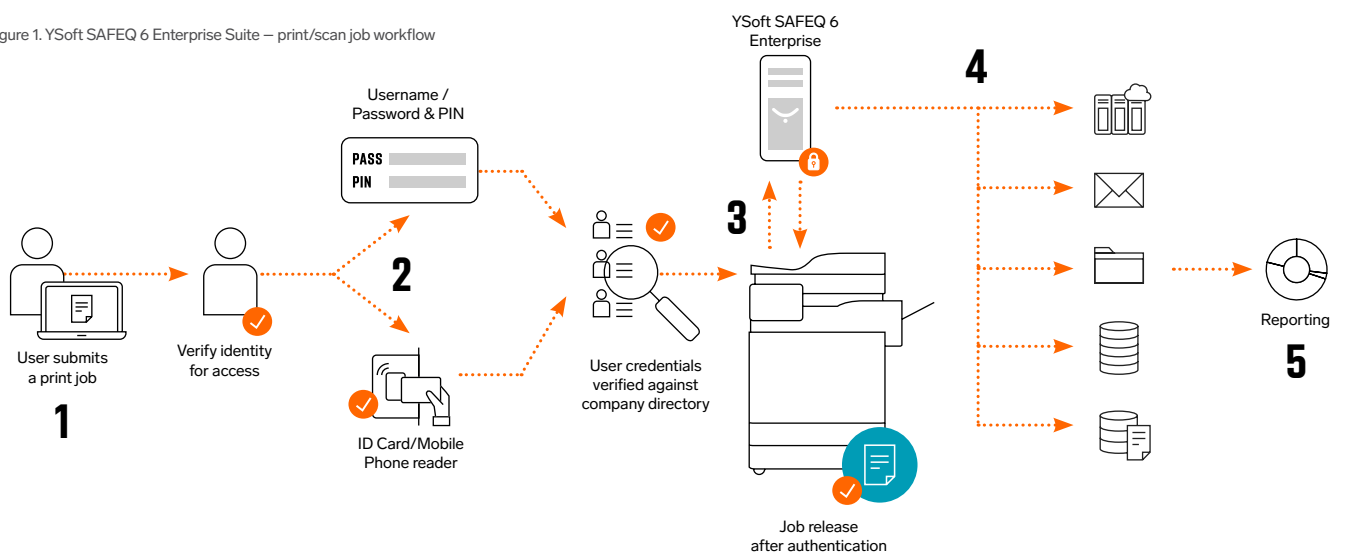

4

Digital documents are delivered to pre-defined destinations automatically.

5

Reporting captures all authentication and print, copy, scan and fax activity.

THE POWER OF ADVANCED SCAN WORKFLOWS WITH OCR

YSoft SAFEQ Automated Scan Workflows can output digital documents directly to pre-defined destinations: email, shared network folder, a cloud-based repository or a third-party application such as SAP, HPE Manager, DocuWare or EPIC. This eliminates human error and increases the security of documents. It also reduces the complexity for users.

Pre-configured settings create a one-button process reducing time spent at the multifunction device (MFD). For administrators, pre-defined templates make creating task specific workflows for users or groups of users easy.

YSoft SAFEQ's powerful OCR Engine produces digital documents that are keyword searchable and editable. Additionally, powerful features such as append/pre-pend, text redaction and text highlighting are included.

THE Y SOFT DIFFERENCE

Hardware

Y Soft is unique as a print management provider because we offer a comprehensive solution that enhances the user experience. Y Soft designs, manufactures and quality tests all companion hardware, so you are assured that software and hardware work well together and are supported by a single supplier.

Contactless Readers

The YSoft MFX Readers are innovative authentication solutions designed to enhance security and streamline user access in any workplace environment. With plug-and-play functionality, multi-card compatibility, and seamless integration with print management, the MFX Card Reader gives you reliable and efficient authentication.

External Terminals

For printers and MFDs that do not support embedded software, Y Soft manufactures external terminals. These external terminals can also be used instead of embedded for a consistent user experience if you have a mixed brand print fleet.

Global Support

Renowned for our excellent, global support, YSoft SAFEQ 6 offers a choice of direct support – where Y Soft personnel works with you on any issue, or indirect support – where your printer provider, a Y Soft certified reseller, provides first or second level support. Whether you choose direct or indirect support, we offer multiple packages to meet your needs.

Why Move from SAFEQ 6 to SAFEQ Cloud?

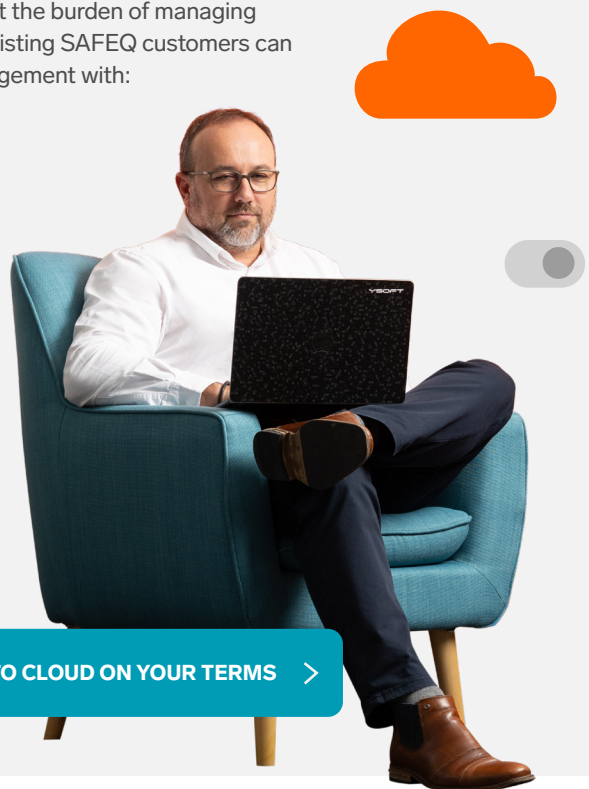

While SAFEQ 6 Enterprise Suite gives customers powerful print management, businesses now rapidly move to cloud-based solutions to reduce IT complexity, enhance security, and scale effortlessly. SAFEQ Cloud offers the same robust print management features, without the burden of managing on-premise infrastructure. With the Cloud Transition License Program, existing SAFEQ customers can seamlessly migrate to SAFEQ Cloud, ensuring future-proofed print management with:

- No on-prem servers: Reduce IT workload and eliminate maintenance costs.
- Automatic updates and security patches: Stay protected with the latest innovations.
- Scalability and flexibility: Support remote and hybrid workforces without infrastructure limitations.
- High availability and disaster recovery: Built-in redundancy for uninterrupted operations.

If you're still running SAFEQ 6, now is the perfect time to consider moving to the cloud.
